Resuscitation, 21 (1991) 299—301
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 21 (1991)

acute blood loss, clinical death, resuscitation, heart injuries, 181
artificial circulation, cerebral resuscitation, coronary perfusion pressure, global brain ischemia, outcome evaluation, ventricular fibrillation, 121
ascites, over-transfusion, 289
atenolol, resuscitation, intracardiac injection, diltiazem, 239
awareness, general anesthesia, 113

bacterial translocation, sepsis, polytrauma, endotoxin, granulocytes, endothelium, cytokines, 137
basic life support, cardiopulmonary resuscitation, training, retention, 67
biological membranes, hemorrhagic shock, postresuscitation period, 89
blood pressure, physostigmine, central control of blood pressure, hemorrhagic shock, 57
blood volume, hemorrhage, hypovolemia, immobilization stress, shock, trauma, 259
blood volume, hypovolemia, hemorrhage, trauma, shock, immobilization stress, 247

calcium entry blocker, cardiac arrest, cerebral ischemia, cerebral protection, nimodipine, cats, 191
cardiac arrest, calcium entry blocker, cerebral ischemia, cerebral protection, nimodipine, cats, 191
cardiac arrest, resuscitation, ventricular fibrillation, mobile coronary care unit, 283
cardiopulmonary arrest, resuscitation, nimodipine, neurological damage, 229
cardiopulmonary resuscitation, basic life support, training, retention, 67
cardiopulmonary resuscitation, open-chest cardiac massage, closed-chest cardiac massage, circulatory support, ventricular assist devices, 7
cats, calcium entry blocker, cardiac arrest, cerebral ischemia, cerebral protection, nimodipine, 191
central control of blood pressure, physostigmine, blood pressure, hemorrhagic shock, 57
central venous pressure, temperature, hyperthermia, heat stroke, monitoring, therapy, crystalloid requirements, 33
cerebral ischemia, calcium entry blocker, cardiac arrest, cerebral protection, nimodipine, cats, 191
cerebral ischemia, resuscitation, DNA damage, free radicals, pyrimidine dimers, thymine glycol, 41
cerebral protection, calcium entry blocker, cardiac arrest, cerebral ischemia, nimodipine, cats, 191
cerebral resuscitation, artificial circulation, coronary perfusion pressure, global brain ischemia, outcome evaluation, ventricular fibrillation, 121
circulatory support, cardiopulmonary resuscitation, open-chest cardiac massage, closed-chest cardiac massage, ventricular assist devices, 7
clinical death, acute blood loss, resuscitation, heart injuries, 181
closed-chest cardiac massage, cardiopulmonary resuscitation, open-chest cardiac massage, circulatory support, ventricular assist devices, 7
coronary perfusion pressure, artificial circulation, cerebral resuscitation, global brain ischemia, outcome evaluation, ventricular fibrillation, 121
crystalloid requirements, temperature, hyperthermia, heat stroke, monitoring, central venous pressure, therapy, 33
cytokines, sepsis, polytrauma, bacterial translocation, endotoxin, granulocytes, endothelium, 137

diltiazem, resuscitation, intracardiac injection, atenolol, 239
DNA damage, cerebral ischemia, resuscitation, free radicals, pyrimidine dimers, thymine glycol, 41

ECG, spectral analysis, postresuscitation period, 25

endothelium, sepsis, polytrauma, bacterial translocation, endotoxin, granulocytes, cytokines, 137
endotoxin, oxygen delivery, hematocrit, viscosity, plasma fluidity, 61
endotoxin, sepsis, polytrauma, bacterial translocation, granulocytes, endothelium, cytokines, 137

first aid, hypovolemia, resuscitation, shock, trauma, 271
free radicals, cerebral ischemia, resuscitation, DNA damage, pyrimidine dimers, thymine glycol, 41

general anesthesia, awareness, 113
global brain ischemia, artificial circulation, cerebral resuscitation, coronary perfusion pressure, outcome evaluation, ventricular fibrillation, 121
granulocytes, sepsis, polytrauma, bacterial translocation, endotoxin, endothelium, cytokines, 137

heart injuries, acute blood loss, clinical death, resuscitation, 181
heat stroke, temperature, hyperthermia, monitoring, central venous pressure, therapy, crystalloid requirements, 33
hematocrit, endotoxin, oxygen delivery, viscosity, plasma fluidity, 61
hemorrhage, blood volume, hypovolemia, immobilization stress, shock, trauma, 259
hemorrhage, hypovolemia, resuscitation, trauma, 207
hemorrhage, hypovolemia, blood volume, trauma, shock, immobilization stress, 247
hemorrhagic shock, physostigmine, blood pressure, central control of blood pressure, 57
hemorrhagic shock, postresuscitation period, biological membranes, 89
hyperthermia, temperature, heat stroke, monitoring, central venous pressure, therapy, crystalloid requirements, 33
hypovolemia, blood volume, hemorrhage, immobilization stress, shock, trauma, 259
hypovolemia, first aid, resuscitation, shock, trauma, 271
hypovolemia, hemorrhage, resuscitation, trauma, 207
hypovolemia, hemorrhage, blood volume, trauma, shock, immobilization stress, 247

immobilization stress, blood volume, hemorrhage, hypovolemia, shock, trauma, 259
immobilization stress, hypovolemia, hemorrhage, blood volume, trauma, shock, 247
intracardiac injection, resuscitation, diltiazem, atenolol, 239

mobile coronary care unit, resuscitation, ventricular fibrillation, cardiac arrest, 283
monitoring, temperature, hyperthermia, heat stroke, central venous pressure, therapy, crystalloid requirements, 33

neurological damage, cardiopulmonary arrest, resuscitation, nimodipine, 229
nimodipine, calcium entry blocker, cardiac arrest, cerebral ischemia, cerebral protection, cats, 191
nimodipine, cardiopulmonary arrest, resuscitation, neurological damage, 229

open-chest cardiac massage, cardiopulmonary resuscitation, closed-chest cardiac massage, circulatory support, ventricular assist devices, 7
outcome evaluation, artificial circulation, cerebral resuscitation, coronary perfusion pressure, global brain ischemia, ventricular fibrillation, 121
over-transfusion, ascites, 289
oxygen delivery, endotoxin, hematocrit, viscosity, plasma fluidity, 61

physostigmine, blood pressure, central control of blood pressure, hemorrhagic shock, 57
plasma fluidity, endotoxin, oxygen delivery, hematocrit, viscosity, 61
polytrauma, sepsis, bacterial translocation, endotoxin, granulocytes, endothelium, cytokines, 137
postresuscitation period, hemorrhagic shock, biological membranes, 89
postresuscitation period, spectral analysis, ECG, 25
pyrimidine dimers, cerebral ischemia, resuscitation, DNA damage, free radicals, thymine glycol, 41

resuscitation, acute blood loss, clinical death, heart injuries, 181
resuscitation, cardiopulmonary arrest, nimodipine, neurological damage, 229
resuscitation, cerebral ischemia, DNA damage, free radicals, pyrimidine dimers, thymine glycol, 41
resuscitation, first aid, hypovolemia, shock, trauma, 271

resuscitation, hypovolemia, hemorrhage, trauma, 207
resuscitation, intracardiac injection, diltiazem, atenolol, 239
resuscitation, ventricular fibrillation, cardiac arrest, mobile coronary care unit, 283
retention, cardiopulmonary resuscitation, basic life support, training, 67

sepsis, polytrauma, bacterial translocation, endotoxin, granulocytes, endothelium, cytokines, 137
shock, blood volume, hemorrhage, hypovolemia, immobilization stress, trauma, 259
shock, first aid, hypovolemia, resuscitation, trauma, 271
shock, hypovolemia, hemorrhage, blood volume, trauma, immobilization stress, 247
spectral analysis, ECG, postresuscitation period, 25

temperature, hyperthermia, heat stroke, monitoring, central venous pressure, therapy, crystalloid requirements, 33
therapy, temperature, hyperthermia, heat stroke, monitoring, central venous pressure, crystalloid requirements, 33
thymine glycol, cerebral ischemia, resuscitation, DNA damage, free radicals, pyrimidine dimers, 41
training, cardiopulmonary resuscitation, basic life support, retention, 67
trauma, blood volume, hemorrhage, hypovolemia, immobilization stress, shock, 259
trauma, first aid, hypovolemia, resuscitation, shock, 271
trauma, hypovolemia, hemorrhage, resuscitation, 207
trauma, hypovolemia, hemorrhage, blood volume, shock, immobilization stress, 247

ventricular assist devices, cardiopulmonary resuscitation, open-chest cardiac massage, closed-chest cardiac massage, circulatory support, 7
ventricular fibrillation, artificial circulation, cerebral resuscitation, coronary perfusion pressure, global brain ischemia, outcome evaluation, 121
ventricular fibrillation, resuscitation, cardiac arrest, mobile coronary care unit, 283
viscosity, endotoxin, oxygen delivery, hematocrit, plasma fluidity, 61
